

NEW! Telemedicine

STONECREEK
Family Physicians

Stonecreek Family Physicians top priority is the health and well-being of our patients. That's why we are implementing alternative options for office visits.

- Video conferencing (telemedicine)

This allows us to care for our patients in new ways that are safe and convenient.

When to use Telemedicine

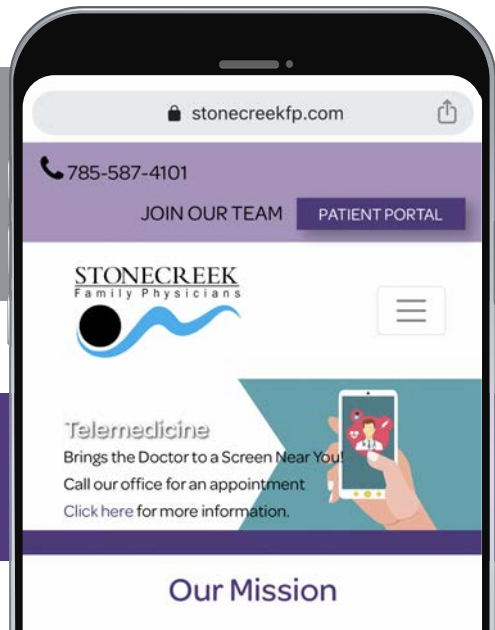

- Routine follow-up visits for chronic conditions
- Routine medication review
- Mild cases of cold/flu symptoms, urinary tract infections, rashes, etc.
- Medical goal setting or advanced care planning
- Mental health concerns such as depression and anxiety

What you will need

- A smartphone, computer or tablet with a forward facing camera

To make a telemedicine appointment, please call your clinic or use your portal message feature to contact your doctor.

Telemedicine is not for well exams, comprehensive health assessments, or complex medical issues

Our Mission
